

3 MARCH 2022

Dear EBRS members, dear colleagues, dear friends,

The Board of the European Biological Rhythms Society condemns the invasion of Ukraine by Russian military forces. As a scientific society, we champion the free exchange of ideas and the rights of all people to scientific information. As individuals, we go beyond this: we abhor the attack on democracy, self-determination, and basic human rights that is now occurring, and we empathise with our Ukrainian colleagues and the citizens of Ukraine. We ask for the restoration of peace to the region, and for the recognition of Ukrainian cultural integrity and sovereignty over their historic territories.

The Board of Directors of the EBRS
